Online Store — Checkout Requirements

1. Introduction

This section describes the checkout flow of the online store for registered and guest customers.

Payment processing is provided by an external gateway and is out of scope of this document.

2. Functional requirements

ID	Requirement	Acceptance Criteria	Priority
FR-1	The system shall allow a customer to review the cart before payment.	Cart page lists item name, quantity, unit price and line total. Customer can change quantity or remove an item.	Medium
FR-2	The system shall calculate the order total including VAT at 14 percent.	Total equals the sum of line totals plus 14% VAT, rounded to two decimals.	Low
FR-3	The system must reject a coupon code that has expired.	An expired coupon shows the message 'Coupon expired' and the total is unchanged.	High
FR-4	The system shall support guest checkout without creating an account.	Guest checkout requires only email, phone and delivery address.	Medium
FR-5	The system shall send an order confirmation email within 5 minutes of successful payment.	Email contains order number, items and total.	Low
FR-6	The system must not allow an order with a quantity greater than 10 for a single item.	Quantity 11 shows a validation error. Quantity 10 is accepted.	High
